BASIC INFORMATION OF AS/NZS 1337.1 2010 FOR SAFETY EYEWEAR

Safety spectacles provide protection against moderate impact hazards, metal chips, particles and sparks. Tinted lenses provide sun glare protection only and are not to be used as welders helpers. Special IRPC lenses should be worn around welding operations. These lens are specially marked with the shade number. IRPC lens provide protection from ultraviolet and infrared rays.

Whenever possible we recommend polycarbonate lens as apposed to glass lens. polycarbonate is far superior in impact restance. Pitted or scratched glass lens should be replaced immediatley as impact resistance is severely reduced.

Safety glasses provide limited protection and are not unbreakable. Severe impact hazards should use machine guards, face shields etc., In addition for proper protection.

Outdoor tinted lenses are intended for outdoor use where no optical radiation hazards. They are for use in solar and ultraviolet radiation situations. UV400 protection on lenses.

TYPE OF LENS	
Untinted or laminated/double glazed	These eye protectors are intended for indoor use where no optical radiation hazards exist.
Outdoor untinted	These eye protectors are intended for indoor and outdoor use where no optical radiation hazards exist other than solar radiation. They are intended to provide adequate protection against ultraviolet radiation from the sun, but are not intended to provide protection against sunglare.
Outdoor tinted	These eye protectors are intended for outdoor use where no optical radiation hazards exist other than solar radiation. They are intended to provide adequate protection against sunglare and ultraviolet radiation from the sun.

LENS MARKING	TYPE OF LENS
I	Medium Impact
V	High Impact
M	Molten metal & hot solid resistant
O	Outdoor use, untinted

PLEASE NOTE:

- These size chart measurements are to fit your actual body. The measurements are not of the garment.
- Please refer to "How to Measure" and use as guide only.
- The best method to get correct sizing is to purchase sample sizes then try them on.

HOW TO MEASURE

NECK

Measure around the neck, allowing room for two fingers behind the tape.

CHEST/BUST

Measure around the chest, making sure the tape is level at the back. A firm chest measurement should be taken.

WAIST

Make sure the pants are sitting comfortably, and measure over the waistband of the pants.

INSIDE LEG

Measure up from the crotch to the top of the heel of the shoe.

HIPS

Measure the fullest part of the hips, making sure tape is level.
